Delegates of the All-Belarusian People's Assembly hold meetings in groups. They share emotions, thoughts, answer questions.

The delegate of the All-Russian People's Assembly from the Mstislavsky District, deputy of the District Council of Deputies Elena Khlimankova met with the teaching staff of the Podsoltovskaya school and employees of the village executive committee.

She shared her impressions from participating in the meeting and spoke about the new National Security Concept and the country's Military Doctrine.

— It is important that the well-being and social responsibility of citizens are enshrined as national interests. In addition, for the first time, the public opinion of different social groups of Belarusian society is taken into account. There is no such clause in foreign similar documents. The need for sociological monitoring of the mood of citizens of the Republic of Belarus is prescribed. That is, at the level of national security, we understand that the opinion of the people is the most important thing. It is the Belarusians who decide how the country will develop," noted Elena Khlimankova.

The deputy emphasized that the All-Belarusian People's Assembly will ensure peace and harmony in society, and will preserve and improve the Belarusian model of a socially oriented state.

“For me, participation in a forum of this level is an opportunity to contribute to strengthening peace and stability in my native country,” she said.

The meeting with fellow villagers took place in a warm, friendly atmosphere. Elena Mikhailovna noted that she was proud of the mission entrusted to her.

“I am a patriot of my country and I will do everything in my power to ensure that we have a peaceful sky, so that my students and children grow up happy, love their homeland and try to leave their mark on it,” she shared.
